## General Healthier Food & Drink Principles

### Plenty of fruits and vegetables

- Use as ingredients, sides, garnishes etc.
- Use seasonal and local produce where possible

### Where possible, choose grainy foods that are wholegrain or wholemeal

- Grainy foods include rice, noodles, bread, wraps, naan etc.

### Food and drink are mostly minimally processed and prepared in ways that minimize sugar, fat, and salt

- Minimally processed can include fresh, washed, aged, dried, frozen, canned, pasteurized or cooked
- Minimise sugar – use natural alternatives e.g. caramelised onions
- Minimise fat – use low fat ingredients and cooking methods e.g. steaming, baking, trimming fat off meat before cooking
- Minimise salt – flavour foods with herbs and spices instead of salt

### A range of portion sizes are available and promoted

- Portion sizes should be appropriate to the occasion e.g. kids size, half size, taster size
- Promote smaller portions with specials

## Drink Guidelines

### Water is the most available and cheapest drink option

- Where possible, free water is provided and/or the cheapest drink available
- Water is the most prominent drink option on display: ≥55% of options, placement at eye level and points of sale, promoted through specials
- While plain, unflavoured water is preferable, water options can also include sparkling water and zero sugar-flavoured waters
- There are no limits to portions size in this category
- Consider other ways to provide water e.g. free chilled water stations

### Other Drinks are not promoted and, if available, make up less than 45% of drink options available

- Portion sizes should be 360mL or less for individually

portioned packages (cans, bottles etc.)

- Prices for other drinks should be higher than water
- 'Other' drinks include diet/zero sugar drinks, low sugar drinks & fresh made fruit/vegetable juices
- No sugary drinks for sale
  - **Sugary drinks** are those with more than >5g sugar per 100mL
  - Sugary drinks could include: pre-bottled fruit and/or vegetable juice, regular fizzy, milky drinks (e.g. milk teas and milkshakes, sports drinks, iced tea.)
- If selling low added sugar and/or fresh made fruit/vegetable juices, limit these (as a group) to be <20% of all drinks on sale and reduce the number of diet/zero sugar drinks so the combined total of 'Other Drinks' on sale are <45% of all drink options
  - **Diet/zero sugar drinks** only contain artificial or natural sweeteners and have 0g sugar
  - **Low added sugar drinks** are those with ≤5g sugar per 100mL. These drinks could include: plain and flavoured milk, sugar-sweetened flavoured water, reduced-sugar juices.
  - **Fresh pressed/squeezed fruit and vegetable juices** – minimise sugar content by diluting with water/ice and serving smaller portions (≤360mL). Flavouring water with a splash of fruit and vegetable juice is also a good alternative.

## High Fat, Sugar, Salt Foods

### Limited Snack, Deep Fried, Confectionery and Ice-cream Options

- Snacks, deep fried, confectionery and ice-cream options are a choice rather than the only option. This group should make up less than 20% of items available on sale.

### Snack Foods

- Pre-packaged snack foods have a Health Star Rating of at least 3.5
- Appropriate portion sizes:
  - Nuts and seeds: ≤50g salted, no-added sugar
  - Popcorn, chips, crackers etc.: ≤800kJ per packet

### Deep fried foods

- Use alternative cooking options as much as possible, such as baking and grilling. Free online best practice

training and certification is available from the [Chip Group](#).

- Portion sizes for deep fried food are limited to an appropriate size - typically >300g (uncooked) per serve of chips >130g (uncooked) Battered fish.

## Confectionery

- Confectionery includes sweets, chocolate, and candied fruit.
- Serving size of confectionery should be single serve, less than 50g
- Whole, fresh, or low/no added-sugar alternatives must always be available and prominent.

## Ice-cream

- Serving size of ice-cream should be single serve
  - 100% fruit and/or vegetable ice blocks <120 ml
  - Ice-creams with no added sugar <200 ml
  - Added-sugar fruit and/or vegetable ice blocks <75 ml
  - Added-sugar ice-creams ≤ 120 ml
  - Lower sugar (<10g per 100ml) and natural sugar products are promoted over high sugar (>10g per 100ml) products

## Bakery items are less than 1/3 of total food options

- More than half of the bakery items on sale must contain wholemeal flour, wholegrains (e.g. grains, oats, bran, seeds) and/or fruit or vegetables (fresh, frozen or dried)
- No or minimal icing (e.g., water icing). Use less saturated fat, salt and sugar. If using confectionery as an ingredient, limit bakery items as a group to 20% of total food options.
- Pies are made using minimal saturated fats and heavily processed meats ([Better Pies Guidelines](#)).
- Appropriate portion sizes:
  - Scones, cake or dessert: ≤ 120 g
  - Loaf, muffins: ≤ 100 g
  - Slices, friands: ≤ 80 g
  - Biscuits, muesli bars, pikelets: ≤ 40 g
  - Pies and quiches: ≤ 180g
  - Pastries: ≤ 65 g,
  - Sausage rolls: ≤ 100g
